- Q. Okay. Did you do that by instant messaging?
- A. I don't ever recall instant messaging a sales rep.
- Q. Okay. Did you talk to them on the phone?
- <sup>16</sup> A. I may have. I know I have had <sup>17</sup> conversations with sales reps via the phone.
- Q. The process we've been talking about, about reviewing the Form 590s, that was the same during the entire time that you had the responsibility for reviewing them?

- <sup>3</sup> don't recall the exact frequency.
- Q. If you made a recommendation to reject doing business with a customer, was there someone else who had final approval, or was that the end of the decision?
- A. Well, from what I recall, I believe
   when I was an investigator, Ed had final
   approval. But I don't ever recall anyone being
   overridden of a recommendation of a denial.
- Q. How would you communicate those recommendations?
- A. Via e-mail, from -- I believe.
- Q. Did you ever use the instant messaging system?

- A. Correct.
- Q. That was at the same time as you
- 4 were reviewing the Form 590s?
  - A. Correct.
- Q. So let's talk about that process.
- <sup>7</sup> What was the mechanism by which you would get
- 8 an order to review?
- A. Oh, the actual sort of computer
- <sup>10</sup> system mechanism?
  - Q. Yeah, like -- what I'm trying to
  - get at is, I'm you, I'm sitting in a chair or
- 13 however, I'm going -- I'm looking at paper,
- 14 like how does the process work?
  - A. The system we had up front, I don't
- 16 recall exactly how it looked or how we got the
- <sup>17</sup> information. I do recall that roughly every
- 18 hour there would be orders that would be pended
- 19 for review. And -- but as far as how the
- <sup>20</sup> mechanism actually worked, I don't remember
- 21 that.
- Q. Did you have to go to a different

Q. In other words, they reached out to <sup>2</sup> you and said that they were interested in you

<sup>3</sup> interviewing and potentially coming to work at

- 4 Teva?
- 5 A. Yes.
- Q. And was that Colleen McGinn? 6
- A. It wasn't Colleen who reached out 8 to me.
- 9 Q. Who was it?
- 10 A. It was an outside recruiting firm.
- 11 Q. Okay. Now, do you think that was a time before you actually had the Drug
- Enforcement agents knock on your door?
- 14 A. Don't recall. Don't recall.

- Q. Who did you interview with?
- A. With Colleen McGinn and Mike
- <sup>7</sup> Edwards, and I think there was an HR person as <sup>8</sup> well.
- Q. And I suspect since you started in

- gotten the job in 2013, maybe the end, around
- the holidays or something?
  - A. Correct.
  - Q. Okay. And so let's talk a little

- 20 Q. Okay. The department is called DEA

- 13 A. Well, that's a -- sort of a root <sup>14</sup> function of it, yes.
- 15 Q. So yes, right?
- A. Yes, to ensure compliance. 16
- 17 Q. Okay. And so when you got there, <sup>18</sup> though, you said there was a program. 19 Obviously you had to do your investigation to

- MR. HAMMOUD: Object to the form.
- 6 THE WITNESS: Well, yeah, and I 7

- 9 did have a system to help -- sorry, I
- 10 stutter. They did have a system in
- 11 order to detect suspicious orders of
- 12
- controlled substances. So it -- and the
- 13 idea was that it was going to be
- 14 replaced with something new. And there
- 15 were other programs that were looked at,
- 16 commercial programs, but when I came in,
- 17 I decided that we should go with a
- 18 program of my own design.
- 19 BY MR. CARTMELL:
- 20 Q. Great. I'll follow up on that
- <sup>21</sup> then. That's a lot of information. But let me
- <sup>22</sup> know if I'm correct in this statement, based on
- <sup>23</sup> my review of the documents.
- 24 When you were hired, you were asked

- standard operating procedures for their
- <sup>2</sup> suspicious order monitoring program?
  - A. No.
- Q. Okay. They existed, it's just that
  - you were not involved in drafting those, fair?
    - A. Correct.
- Q. And those were standard operating

- 10 A. I would like to say that they
- <sup>11</sup> describe the process.

21

- Q. Okay. But they were --
- A. Not necessarily govern but describe 13 14 the process.
- Q. I understand. If somebody were to
- <sup>16</sup> ask AmerisourceBergen, did you have standard
- operating procedures that would tell how the
- process worked or how it was supposed to work,
- 19 there were those policies in effect, correct?
- 20
  - A. I would say that's fair, yes.
  - Q. Okay. You mentioned previously
- 22 that you were also involved in the due

Q. Let me strike it. A program that

<sup>7</sup> you believe -- for suspicious order monitoring 8 that you believe is appropriate and in

11 MR. HAMMOUD: Object to the form, 12 calls for a legal conclusion.

13 THE WITNESS: It could be a fair 14 assessment.

## 15 BY MR. CARTMELL:

16 Q. Okay. In other words, it's not just the new orders coming in, going through a program on the computer, an algorithm, that's not the only facet or part of the program, 20 correct?

21 A. That is correct.

22 Q. Another facet of an appropriate 23 DEA-compliant suspicious order monitoring

program would include due diligence, for

<sup>4</sup> AmerisourceBergen, I think you testified in your deposition that you had been involved in

<sup>6</sup> investigating and reporting hundreds of

<sup>7</sup> suspicious orders per month to the DEA,

correct?

A. Correct.

10 Q. So fair to say, and I just want to <sup>11</sup> make it clear, prior to coming to Teva, you had, as the manager and investigator over the 13 years at that company, been involved in <sup>14</sup> reporting hundreds of suspicious orders to the 15 DEA, fair? 16

A. That is correct.

17 Q. Okay. And I take it you also had experience from your time as manager at AmerisourceBergen or investigator there with actually finding suspicious orders for opioids 21 from customers and actually stopping the <sup>22</sup> shipment of those opioid narcotic drugs. Is

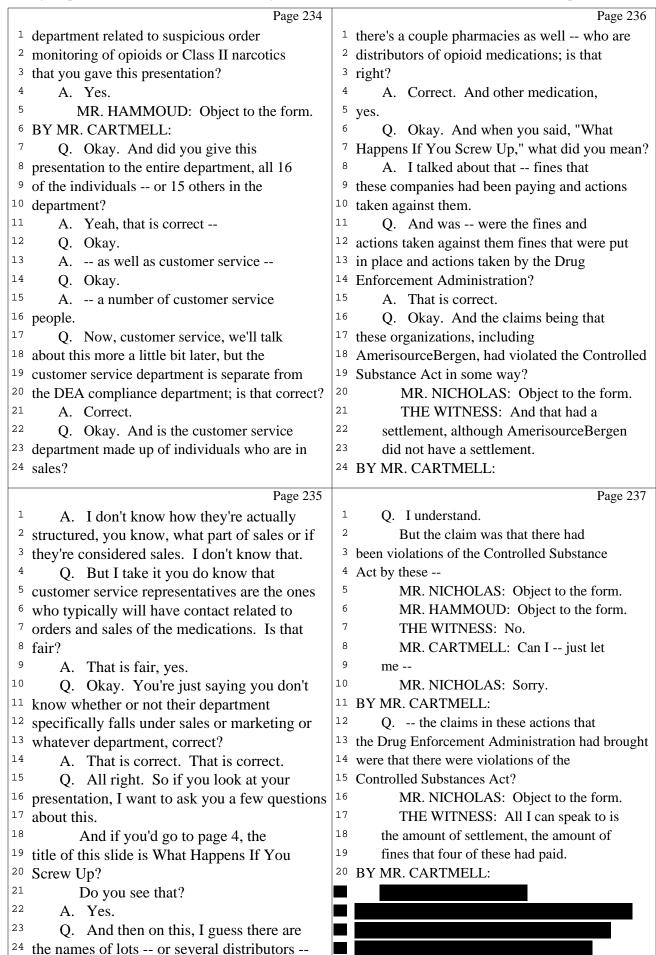

23 that fair?

A. It's a fair assessment, yes.

Q. Okay. How did the new DEF OPS computer algorithm that you helped design and 11 develop and put in place at Teva -- how did that make the program better or improved and 13 more robust?

A. Well, I think it improved what I call the signal-to-noise ratio. And that's <sup>16</sup> orders that were pended for investigation that really didn't need to be pended for investigation.

19 And so it provided orders that were <sup>20</sup> more -- that had, you know, higher likelihood of possibly being suspicious or ones that had <sup>22</sup> more specific red flags about them.

23 Q. Okay. And do you know -- I think <sup>24</sup> there's documents discussing this, but -- the

Page 277

A. Oh, I'm sure there are.

Q. Okay. And is your testimony that when DEF OPS went into play, it was flagging less than SORDS 2, or do you know?

A. I can't remember specifically.

Q. You don't know one way or the 10 other?

11 A. As I sit here, I don't know one way 12 or the other, yeah.

Q. Okay. I also want to ask you about <sup>14</sup> the due diligence, as you described, that Teva had been doing related to suspicious order monitoring prior to the time you became the manager at Teva. Okay?

A. Okay.

18

12

23

24

19 Q. Do you, as you sit here today, recall to what extent Teva was doing due diligence on new clients or new customers?

22 A. Well, when I came in, it was my <sup>23</sup> understanding that there hadn't been a new customer approved or even brought on in years.

Page 275

<sup>1</sup> number of items or orders that were pended or <sup>2</sup> flagged by SORDS 1 and II, at least as of 2012,

Do you remember that?

A. For SORDS 1, yes.

O. Yes.

5

6

7

8 And do you know how many orders were pended per SORDS 2? 9

10 A. Offhand, no.

11 Q. Okay. Do you know whether or not your new program that was put in place called 13 DEF OPS ended up flagging or pending more or 14 less than SORDS 2?

15 A. It seems to be not a whole lot <sup>16</sup> different in terms of numbers of orders pended, but I'd have to go take a look specifically to 18 see, you know, the ultimate numbers.

19 But, of course, I'm looking now, <sup>20</sup> and we have, you know, additional controlled substances that we're reviewing currently. 21 22

At the time, the number of orders <sup>23</sup> being reviewed, I believe, went down, but the

<sup>24</sup> number of manual -- deeper investigations went

Q. How many years?

A. Don't know how many years. It was described as, in years.

Q. So your testimony is that there was <sup>5</sup> no need for any due diligence related to new clients at Teva prior to 2014 because for years, there hadn't been any new clients?

8 MR. HAMMOUD: Object to the form. THE WITNESS: Well, that's how it

10 was described to me.

BY MR. CARTMELL:

Q. Who told you that?

A. I can't remember who. May have 13 been Matt. May have been Marianne.

15 Q. Okay. I want to ask you a little <sup>16</sup> bit more about the report from Mr. Buzzeo.

Sir, if you can go to page 1 of Mr. Buzzeo's report related to the suspicious order monitoring program at Teva, the bottom paragraph, the first sentence states, New accounts are opened infrequently, and there is minimal due diligence.

Do you see that?

A. Correct. Correct, yes.

- Q. But you were told that they had not had new accounts or customers in years?
- A. That's what I believe, I was told
   something similar to that, when I came aboard.
- Q. Okay. What would you have
   expected, based on your experience and
   expertise in suspicious order monitoring

- A. What would I have expected them to have done prior to me joining Teva? I don't recall seeing any file on a new customer.

  Mr. Buzzeo and his team were told that there
  were new accounts, but they were infrequent,
  correct?
- A. Yes, infrequent --
- <sup>19</sup> Q. Okay. So --

  - <sup>2</sup> to determine whether customers are adequately
  - <sup>3</sup> registered with the DEA and performing
  - <sup>4</sup> business/credit inquiries.
    - Do you see that?
    - A. Yes.
  - Q. Okay. So based on this report, you
  - 8 can see that prior to you arriving, or in 2012,
  - <sup>9</sup> if they had a new account, all they would do is
  - <sup>0</sup> check to see if it -- if that individual
  - <sup>1</sup> customer was registered with the DEA and then

And I want to make a point or ask a question here.  We saw from Mr. Buzzeo's report about the SORDS previous computer algorithm, and it made a statement that at that time, SORDS, in 2012, was only pending or flaggingwhat was it? 10 orders a week?  MR. 1 Q. This risk -- let me restate it. 2

This risk, where it says, False <sup>3</sup> approval and release of suspicious sales

- orders, what does that mean to you?
- A. I can tell you what my conversation with Itai was.
- Q. Really, what I want to hear is 8 what -- Mr. Rigbi's statement, where he says,
- <sup>9</sup> False approval and release of suspicious sales <sup>10</sup> orders -- is the risk associated with this
- <sup>11</sup> finding of your department.
- 12 A. And what he was talking about was 13 the final click of the button to release, that 14 he wanted two people there to witness the click <sup>15</sup> of the final button.
- 16 Q. Your testimony is that there could <sup>17</sup> be false -- mistakes, he was saying, if only one person was pushing a button that went from hold to release on an order?

- A. No.
- Q. You disagree with Mr. Rigbi's findings, correct?
- A. With the finding as written here,
  - yes. And I'm trying to find where that was. Q. Why was it that even though the
- internal audit found this to be a moderate risk
- and that could lead to the false approval and 11 release of suspicious sales orders by only
- 12 having one individual who was pushing that
- <sup>13</sup> button, as you say -- why is it that you
- decided not to have additional individuals, as
- suggested, to be involved in that process?
- A. Well, they are involved in the process. I'm talking the actual physical
- clicking of the button. That's what this was discussing.
- 20
  - Q. I understand.
- Why is it that even though the 22 internal found that that could be a risk of
- <sup>23</sup> you-all going ahead and missing a suspicious
- <sup>24</sup> order or sending out a suspicious order that

- Q. And he, Mr. Rigbi, when he did the
- internal audit, categorized this risk as
- moderate; is that correct?
- A. Correct.
- Q. If you look at the last page,
- there's a description of what a moderate risk
- is: is that correct?
- 8 A. Yes.
- Q. And it states, This is an internal <sup>10</sup> control or risk management issue that could
- <sup>11</sup> lead to financial losses; loss of controls
- <sup>12</sup> within the organizational entity or process
- <sup>13</sup> being audited; reputation damage, such as
- <sup>14</sup> negative publicity or local or regional media;
- <sup>15</sup> adverse regulatory impact, such as public

- 18 It then states, As a moderate risk <sup>19</sup> issue, timely management attention is
- <sup>20</sup> warranted. The finding should be reported to <sup>21</sup> the audit committee as necessary.
- 22 Do you see that?
- 23 A. Yes.

Q. So I was wrong? Those aren't opioid pills?

- A. No, they're not opioids.
- <sup>4</sup> Q. What are those?
- <sup>5</sup> A. It's clonazepam.
- 6 Q. And what is that?
- A. It's an anti-anxiety medication.
- <sup>8</sup> Q. So what do you present -- or what
- 9 do you mean by this slide that you present10 multiple times to your team?
- A. Oh, that I -- well, it's two
- 12 things, because if you notice, a lot of the
- <sup>13</sup> photographs that I've used in presentations
- $^{14}\,$  have been a lot of pictures of pills and some
- <sup>15</sup> illicit drugs.
- And they're all taken from a single
- 17 thread on Reddit in about a 15-minute search
- <sup>18</sup> called, What drugs are you doing this weekend?
- <sup>19</sup> And these were pictures taken by what appeared <sup>20</sup> to be abusers of pills.
- And some of them look very nice, in
- <sup>22</sup> very nice pictures, and I like to use them to
- 23 show, to demonstrate that our product is ending
- <sup>24</sup> up at the street and that we must be vigilant.

Page 375

- But we believe we have a very good
- $^{2}\,$  program in place and that when we identify a
- <sup>3</sup> suspicious order, we take action, when
- <sup>4</sup> appropriate, against the customer and terminate
- <sup>5</sup> the customer, all of whom are still registered
- <sup>6</sup> by DEA and still shipping opioids, by the way,
- <sup>7</sup> but I don't believe that they're appropriate
- 8 for Teva to do business with.
- <sup>9</sup> So I believe our program is good.
- <sup>10</sup> That's what I'm saying here.
  - Q. How many reports of suspicious
- orders have you made to the DEA in 2018?
- A. Oh, I think it's close to 50.
- 14 Q. 50.
- And who are the customers that you reported in 2018?
- A. In 2018, I've reported Kroger.
- <sup>18</sup> I've reported Rochester Drug. I've reported a
- $^{19}$  company called R&S Sales. I have reported
- <sup>20</sup> McKesson.

24

- And some of these orders aren't
- <sup>22</sup> orders that were even identified by the DEF OPS
- 23 system that we've found through other pieces.
  - Q. Documents that we have been

<sup>1</sup> provided by Teva in this lawsuit from their

- <sup>2</sup> internal files suggest that in 2018, you have
- made one, two, three, four, five, six, seven,
- <sup>4</sup> eight, nine -- ten suspicious order reports to
- eight, nine -- ten suspicious order reports to
- the DEA on Rochester Drug. Does that seemright to you?
  - A. Yes, that sounds about right.
  - Q. Okay. But you made these orders,
- <sup>9</sup> actually, after you already knew that there was
- <sup>0</sup> an ongoing investigation related to Rochester
- <sup>1</sup> Drug, didn't you?
  - MR. HAMMOUD: Objection to the form.
  - THE WITNESS: No. We -- I had
- terminated sales of controlled

- that there was an investigation into
- them.

- Q. But in 2018, when you terminated
- <sup>21</sup> those sales, you already knew of that
- <sup>22</sup> investigation, didn't you?
- A. No. No. I had terminated sales
- <sup>24</sup> before -- it was before we learned of the
  - Page 377
- <sup>1</sup> investigation into them.
- Q. So your testimony under oath is
- <sup>3</sup> that all of the reports you made on Rochester
- <sup>4</sup> to the DEA based on their suspicious orders
- <sup>5</sup> came after --
  - A. No.
- O. Excuse me.
  - -- came before you learned of an
- <sup>9</sup> investigation into that entity?
- A. Oh, no. That's not what I'm saying
- <sup>11</sup> at all.

- Q. Okay. I think you just told me a
- 13 minute ago that you made all those reports --
  - A. No, that's not --

- A. No, that's not what I said. I said
- <sup>17</sup> I stopped selling them controlled substances
- <sup>18</sup> before I knew.
- Q. Okay. So what you're saying -- I
  - <sup>0</sup> guess I misunderstood you. What you're saying

A. I can think of a couple times
offhand where there has been a little bit of

But I will say there's never been a time that I've either been, you know,

If I'm not comfortable, if I have red flags, it doesn't ship.

Apparently, when you presented this slide, you thought there may be a potential, at Q. But isn't that the conflict, that least, conflict here with customers, correct? you have a company -- from a sales perspective, 10 A. Well, potentially a conflict with a <sup>10</sup> individuals who are trying to maintain 11 customers, increase profits, make the sales of 11 customer, yes. 12 the opioids, versus your job, which is to make Q. Okay. Another potential conflict <sup>13</sup> that you identified has to do with customer sure you don't lose your registration by service, correct? <sup>14</sup> violating the Controlled Substances Act? Isn't 15 that the conflict you're talking about? A. Yes. MR. HAMMOUD: Object to the form. 16 16 Q. Okay. - A. Interpersonal conflict as far as <sup>2</sup> the lack of education of the importance of a <sup>3</sup> good suspicious order monitoring program and <sup>4</sup> why a suspicious order monitoring program is <sup>5</sup> needed.
- Q. You're saying that customer service <sup>7</sup> employees typically are not trained or don't understand the importance of why a suspicious order monitoring program is needed?
- 10 A. No.

11 MR. HAMMOUD: Objection to the 12 form. Mischaracterizes the prior 13 testimony.

14 THE WITNESS: Yeah, that's not what 15 I said at all. There is importance of 16 training.

17 BY MR. CARTMELL:

- 18 Q. What did you say? Say it again, 19 please.
- 20 A. I said there is an importance of 21 training --
- 22 Q. No, no, no, no. I don't mean to 23 interrupt you.
- 24 What is the conflict related to

- <sup>1</sup> try to then pressure you and push you into <sup>2</sup> releasing suspicious orders --

- BY MR. CARTMELL:
- Q. -- if they really don't understand it well enough?
- MR. HAMMOUD: Objection to the 9 form.
  - THE WITNESS: Well, that could be a potential. That could be a potential.
- 12 BY MR. CARTMELL:
- Q. Okay. So that's one type of conflict you're talking about you may need to manage?
  - A. Correct.
- 17 Q. Okay. And then you say, finally, that you need to manage a conflict related to 19 sales.
  - A. Mm-hmm.
- 21 Q. Is that the same type of issue? 22
  - A. Exactly.
- 23 Q. Because the salespeople,
- potentially, if they're not properly educated

Page 403

- <sup>1</sup> customer service that you need to manage that you are presenting here?
  - A. Oh, it's --

3

- Q. What's the conflict? 4
- A. It's an interpersonal -- it's a
- <sup>6</sup> potential for interpersonal conflict if you
- <sup>7</sup> don't educate these groups for either the
- <sup>8</sup> importance of either a suspicious order
- <sup>9</sup> monitoring program, anti-diversion efforts, or
- 10 you know, the -- well, the importance of, you <sup>11</sup> know, education in this staff.
- 12 Q. Education to the customer service 13 people, right?
- 14 A. To customer service people, to 15 sales, and to customers.
- 16 Q. Okay. And if you don't educate <sup>17</sup> them properly and these people don't understand
- the importance of the suspicious order
- monitoring program, then what is the conflict
- that is created?
- 21 A. That they don't understand what a 22 suspicious order monitoring program is doing.
- Q. And what's the conflict that's
- created because of that? Is it because they

Page 405 <sup>1</sup> and really don't understand the importance of

- <sup>2</sup> your suspicious order monitoring program, they
- <sup>3</sup> might create a conflict with you because they
- <sup>4</sup> might pressure you and push you to release
- <sup>5</sup> sales that you otherwise shouldn't, correct?
- A. Well, and I wouldn't characterize <sup>7</sup> the question that way, because, again, I
- <sup>8</sup> haven't released anything that I'm not
- comfortable with, and I haven't -- and, you
- <sup>10</sup> know, no salesperson, no customer service
- person, or -- and no customer has ever badgered
- or cajoled me into releasing something where I
- still thought there was a red flag.
- Q. Okay. What you're saying is that, though, the conflict is, if you don't educate
- the salespeople and they don't know or
- understand how important a suspicious order
- monitoring program is, they might pressure you;
- they might, you know, try to lean on you to get rid of the hold.
- 21 But what you're saying is that if 22 they do that to you, then you're not going to
- succumb to that pressure, correct?

This is not, in fact, an e-mail. 12 A. Teva generic operations. 13 Is this a text? 13 Q. And that's who you report to? 14 A. No. These were my notes as 14 A. Not anymore. Q. Okay. You did at the time? <sup>15</sup> Christine was yelling at me. 15 16 Q. Okay. Okay. So what was happening 16 A. Yes. was, you were on a phone call with Christine 17 Q. Okay. There's a 10:10 call, and <sup>3</sup> it's about the Publix issue that we've been Her point there is that Publix is <sup>4</sup> talking about and those potentially suspicious potentially a very big or is a very big <sup>5</sup> orders, right? customer, right? A. Yes. A. Yes. 7 7 Q. Okay. And it says -- I want to go Q. With lots of sales, right? down a little bit. A. Correct. It says, Christine Baeder; berated, O. So she misinterpreted what 21 talking about related to held potentially <sup>22</sup> you were saying, right? <sup>22</sup> suspicious orders from one of your customers, 23 <sup>23</sup> Publix? A. Yes. 24 24 Q. I offered to meet with the A. Correct.

Page 434

Q. And here I only need to ask you questions about the top e-mail because we've covered everything below it.

<sup>4</sup> A. No, we haven't covered everything <sup>5</sup> below it.

6 O. We haven't?

7

8

A. No. That's results of my review.

Q. Oh, we're going to cover that.

<sup>9</sup> We're going to cover that. Okay. I apologize

10 for that. But that's coming in a later

<sup>11</sup> exhibit, okay? Okay.

So this is an e-mail from you to
Colleen McGinn. Now we're up to October 28th,

14 so we're almost two weeks later, correct?

<sup>15</sup> A. Correct. And the orders are still <sup>16</sup> held.

Q. And you're still holding the ordersfrom Publix.

You state, Colleen -- to your boss,

<sup>20</sup> Colleen -- based on previous investigations, I

<sup>21</sup> think it is highly likely that at a corporate

<sup>22</sup> level, Publix is not aware of these issues. We

23 should schedule a face-to-face meeting with the

<sup>24</sup> relevant Publix stakeholders to discuss their

2 434

Q. Okay. And Anda is a distributor that would provide them to Publix; is that correct?

<sup>1</sup> all orders for Anda as well.

<sup>5</sup> A. Correct. They were holding -- at <sup>6</sup> the time, they called it a virtual vault. And

<sup>7</sup> so they would manage the orders for them. And

Page 436

Page 437

<sup>8</sup> so the product would be shipped to Anda on

<sup>9</sup> behalf of Publix. And so we were holding not

10 only Publix orders that were to go through

Anda, but we were also holding all other Andaorders as well.

Q. Okay. And the reason you were holding, though, the Anda orders was because your understanding was Anda was going to distribute those to Publix, correct?

MR. HAMMOUD: Objection to the form.

THE WITNESS: That -- on not all of it, but that some of the product shipped to Anda could be delivered to Publix.

22 BY MR. CARTMELL:

Q. Okay. Now, after you had heldthese orders, you did an investigation of these

Page 435

ongoing prescriber due diligence and related

<sup>2</sup> diversion control efforts.

You say, I am comfortable releasing
the product we currently have on hold, provided
Publix agrees not to distribute our oxycodone
products to these nine locations.

That's meaning the locations thatyou had investigated; is that correct?

A. Correct. That is correct.

<sup>10</sup> Actually, there were ten locations but nine <sup>11</sup> that I wanted restricted.

Q. Okay. There were ten actual pharmacies at Publix that were making orders and you wanted nine of them restricted?

A. Correct.

Q. Okay. I made a mistake. I want to now go down to and look at the e-mail below that that this was in response to, okay?

<sup>19</sup> A. Okay.

15

Q. Okay. So this is again almost two weeks later and you've still held these Publix orders.

A. Well, in a -- I have to give an

<sup>24</sup> addition. We were also holding orders for --

orders to try to determine whether or not they

<sup>2</sup> were suspicious, correct?

A. Well, it wasn't really an

<sup>4</sup> investigation into the order itself. It was an

<sup>5</sup> investigation into the overall oxycodone

<sup>6</sup> business at these ten locations.

Q. Let me restate it. The orders were

held by -- was it DEF OPS at this time?

9 A. No. Well, it -- they would have

been held by DEF OPS, but I was aware that the
 orders were coming prior to them hitting DEF

<sup>12</sup> OPS.

Q. Okay. But your understanding is

that the computer algorithm, the new one -- the
 updated one and improved computer algorithm

16 called DEF OPS actually flagged or pended these

orders from Publix, correct?

A. For all customers who were ordering this product.

Q. Okay. And after the orders were

21 flagged and pended and you knew about them, you

22 then, as the manager of the suspicious order

23 monitoring program, went and did an

<sup>24</sup> investigation into -- more of an investigation

Page 438 <sup>1</sup> into, frankly, your customers' customers, A. Well, and not the volume of it but <sup>2</sup> right? <sup>2</sup> the ratio of the 40-milligram compared to the 3 A. Correct, the downstream pharmacies, <sup>3</sup> 20-milligram, the 10-milligram, the 4 yes. <sup>4</sup> 80-milligram, that the 40 was the top one. And 5 <sup>5</sup> I felt that was unusual and warranted Q. And part of the reason you did that <sup>6</sup> is because, as we said in prior e-mails, you <sup>6</sup> investigation. <sup>7</sup> said there were red flags that made you want to Q. Okay. And then you went to work investigate further, correct? and you actually did -- like you said earlier, A. Correct. I think, you got online and you did some 10 Q. Things like the dosage or the 10 Google-type searches and things like that, did 11 breakdown of how they were ordering the 11 you not? 12 oxycodone, right? A. Well, did some Google searches, 13 MR. HAMMOUD: Objection to the 13 looked at the -- you know, verified licenses of 14 form, asked and answered. prescribers, looked for -- you know, 15 THE WITNESS: Yeah, the -- you essentially telling the story of who the 16 know, the breakdown of strength on the prescribers are of these products. So what I was investigating was in Florida, a place where you knew this type of drug was sought after by abusers, wasn't our product, it was another company's 22 correct? product. 23 23 A. Well --Q. Okay. Let's see what your 24 <sup>24</sup> investigation found. And you say that and MR. HAMMOUD: Objection, asked and Page 439 Page 441 1 answered. <sup>1</sup> summarize that in your e-mail below of 2 <sup>2</sup> Wednesday, October 28th, to Colleen McGinn, THE WITNESS: Yeah, and Florida 3 your boss, correct? wouldn't have been the only reason to 4 A. Correct. Because this primarily hold the product. BY MR. CARTMELL: <sup>5</sup> involves another company's product, yes. 6 Q. It's just one red flag, right? Q. Okay. And you say, On October 27, 7 A. That was going to be the --<sup>16</sup> primarily the strength mix of what they were 16 A. Correct. 17 looking for, that it was hyped [sic] to the Q. Okay. And you had asked Publix, 40-milligram product, that that was the top right -- you had asked the salespeople to go to <sup>19</sup> strength that they were looking for. A. Now, are you talking from just a philosophical standpoint?

Q. I'm talking about your understanding of why that's important.

A. Well, and again, you know, that <sup>9</sup> becomes a philosophical question, you know, not

10 just a regulatory question, because that --11 from my personal standpoint, you know,

12 that's -- well, a couple reasons. With

13 controlled substances, it's to help keep

14 product in legitimate supply channels and to

<sup>15</sup> keep them away from abusers. From a contract

<sup>16</sup> diversion standpoint, the primary risk there is

<sup>17</sup> inflating costs to hospitals through gray

So if we find something that is in one geographic area, you know, with the way that we do our peer comparisons, we're comparing, you know, a customer who may be servicing, you know, a lot of pharmacies in the Appalachian area, they're going to be compared to other geographic areas. So if, you know, they're elevated compared to a different geographic area, that is going to be something that is more likely to be further investigated.

Page 490 <sup>1</sup> about Richie Pharmacal. Q. Why was that something that you <sup>2</sup> wanted to put in your report, if you recall? 2 (Exhibit Teva-Tomkiewicz-025 marked 3 A. It seems unusual that a doctor for identification and attached to the <sup>4</sup> dealing with hydrocodone, the top strength of transcript.) BY MR. Oh, I sent it to Colleen. A. Yes. 11 Q. Oh, I'm sorry. And this, I assume, 11 Q. Do you recall how you came to that was based on an investigation that you did 12 conclusion? <sup>13</sup> based on what would eventually be reported as A. Oh, well, that's through anecdotal 14 the Richie Pharmacal suspicious orders, <sup>14</sup> reports on the Internet, patients chattering about the doctor and about how much they have correct? 16 16 to pay to get in to see the doctor. If you're A. Correct. 17 going to see the doctor, you know, be prepared Q. And you'll see that he had --<sup>18</sup> Richie Pharmacal has, I assume, provided you because it's going to be this much money. some information about its customers. Is that Those sorts of things. fair to say? 20 Q. And then you have the anecdotal 21 A. Correct. comments down here. Where did you find those? 22 22 Q. And then you did an investigation A. Well, they're actually listed. on its customers, correct? Vitals.com, topics.com, a lot of topics.com. Q. And the reason why you put this in A. Correct. Page 491 Page 493 Q. I want to direct your attention to 1 <sup>1</sup> your memo is that I assume that you believe <sup>2</sup> the last page of this exhibit. Do you see the <sup>2</sup> that these were red flags for diversion <sup>3</sup> reference to Dr. Trent Cross in Oneida, <sup>3</sup> activity going on at Dr. Cross's medical 4 Tennessee? practice? 5 A. Yes. 5 A. Oh, yes. Q. And it says in the first bullet 6 Q. Are you aware of whether or not point, In the last six months, Richie sold Dr. Cross ultimately lost his medical license? Dr. Cross 56,000 tablets of hydrocodone. 8 A. That I don't know. 9 A. Yes. Q. Did you report any of the -- of

10 Q. And in 2014, was Teva making 11 hydrocodone?

A. No. That was someone else's 13 hydrocodone. Well, we did have a hydrocodone 14 with ibuprofen product, but we discontinued it 15 around this time. I think before this.

16 O. And you sort of identify some other <sup>17</sup> interesting factors about Dr. Cross, including that 69 percent of Richie's hydrocodone sales

to Dr. Cross were 10 milligrams, correct? 19 20 A. Correct.

21 Q. And then it says that he maintains <sup>22</sup> two offices, a Way-Less Weight Loss Clinic and <sup>23</sup> a Cross Medical Clinic?

24 A. Correct.

10 this related to Dr. Cross to the DEA?

A. Yes, I did.

11

12

Q. And do you know when you did that?

13 A. It would have been around this

<sup>14</sup> time. And it was actually an unusual

situation, which is why I remember it, in which

<sup>16</sup> it was one of the two times the DEA actually

contacted me about a suspicious order report.

And so someone from I think the Louisville

office had called me up -- and I have his name

<sup>20</sup> somewhere, but, you know, it's a few years ago,

21 so I can't quite remember it -- and he asked

<sup>22</sup> about details about Richie and why we cut them

<sup>23</sup> off, and so I gave him the details, and I said,

<sup>24</sup> you know, I have a whole file full of notes and

Page 494

- <sup>1</sup> things, send me a subpoena and I'll send you <sup>2</sup> all my notes. So he sent me a subpoena and I <sup>3</sup> sent him all this stuff.
- (Exhibit Teva-Tomkiewicz-026 marked 5 for identification and attached to the
- 6 transcript.)
- BY MR. GASTEL:
- 8 Q. And I'm going to show you another exhibit which is Exhibit 26.
- 10 A. Does he still have his license?
- 11 Q. I believe it's been suspended,
- but -- for a variety of reasons.
- 13 A. That's actually a good thing.
- 14 Q. This is another suspicious order report that you sent to the DEA, correct?
- 16 A. Correct.
- 17 Q. Once again detailing Richie
- Pharmacal, correct?
- 19 A. Correct.
- 20 Q. So between your original report to
- 21 the DEA in December of 2014 and this report in
- <sup>22</sup> December of 2015, do you know if Teva filled
- any orders for Richie Pharmacal?
- A. No controlled substance orders.

- Page 496 <sup>1</sup> something else following up, just to see if
  - <sup>2</sup> they get it through.
  - And the next day, orders came
  - <sup>4</sup> through for buprenorphine with naloxone. And
  - <sup>5</sup> so that helped to reinforce my suspicion that
  - <sup>6</sup> that first one was a test order just to see if
  - <sup>7</sup> they could place the order.

- BY MR. GASTEL: 11
- 12 Q. I'm going to show you Exhibit 27.
- And this is a letter that you ultimately sent
- to Richie Pharmacal, correct?
  - A. Correct.
- 16 Q. It says, In response to your recent
- request, please be advised that Teva
- Pharmaceuticals has decided to discontinue
  - sales of controlled substances to Richie
- Pharmacal.
- A. Correct.
- 22 Q. And this letter is dated
- <sup>23</sup> January 22nd, 2016.
  - A. Correct.

Page 495

- Q. And then why did you have a second 1 report related to Richie Pharmacal then?
- 3 A. Well, because they placed an order <sup>4</sup> for these products.
- Q. And what made it suspicious, in your mind?
- 7 A. Well, actually, two things. The
- <sup>8</sup> first is that they're not allowed to receive
- <sup>9</sup> controlled substances from Teva. So the act of
- <sup>10</sup> placing an order in itself is suspicious. And
- 11 then the nature of the order I found highly
- 12 suspicious.
- 13 The -- if you notice, there's two
- <sup>14</sup> different dates, 6-23 and 6-24. The order on
- <sup>15</sup> 6-23 for a small amount of a product called
- <sup>16</sup> estazolam. Estazolam isn't a highly abused
- <sup>17</sup> product. I don't know how other manufacturers
- 18 of estazolam view it, but that -- it's often
- <sup>19</sup> considered a very little abuse potential. It's
- <sup>20</sup> a Schedule IV, so it's, you know, farther down
- 21 on the schedule. But what it appeared to me in
- <sup>22</sup> a -- and I held that without reporting it on
- 23 that day because my suspicion said this was a <sup>24</sup> test order and they're going to try to order

- Q. So prior to that, how did you
- <sup>2</sup> communicate to Richie Pharmacal that you were

Page 497

- <sup>3</sup> not going to fill controlled substances orders
- 4 for them?
- A. We did have phone calls with
- Richie.
- Q. And what prompted this letter of
  - January 22nd, 2016?
- A. They kept asking, what can we do to
- get back in your good graces, essentially. I'm
- 11 not saying that was the exact words they were
- 12 using. But that -- they kept placing calls to
- 13 different people within the company, you know,
- <sup>14</sup> what can we do to get turned back on, what can
  - we do to get turned back on. And I said,
- there's nothing really you can do.
- Q. Did you alert any of your other
- customers not to send Teva product to Richie
- 19 Pharmacal?

20

21

24

- A. No.
- Q. I want to talk a little bit
- <sup>22</sup> specifically about some other parties specific
- to the Tennessee action.
